																								$54,994,000	$40,782,000

Aug 2009 Average Warning Device Cost on CJ Corridor is $284,000	166	Speed increase to 79mph	23	Crossbucks only
Estimated Average Warning Device Cost on CSX is $234,741 for ORDC Recommendations	16	Speed increase to 60mph	9	Lights only
Estimated Average Warning Device Cost on CSX is $156,842 for Amtrak Recommendations	13	Speed increase to 49mph	174	Lights + Gates
FY10/11 Projects	33	Additional track only	206	Public Crossings
Current (FY2009) Project	39	Speed increase + additional track*	62	Private Crossings
Private Crossing	1	Speed increase + other (Weber Rd.)	268	Total
	268	Total		

*all speed increases + additional track involve 79mph speed increases

Assumptions

All existing light & gate installations (units) are MUTCD & FRA compliant, i.e. $0 for corrective action involving the physical units (not including circuitry upgrades)
Preemption data and distances to signalized HW-HW intersections has been provided by satellite pictures, and thus may be subject to change.
All crossings with signalized traffic signals within 600ft of the crossing will be analyzed.
All crossings with signalized traffic signals within 300ft of the crossing will likely require railroad preemption and a factor of $200,000 is added to the costs of those crossings.
Crossings have been cut into sections determined by RR mileposts. For the purposes of this analysis, only crossings that have had characteristics change have been identified and there may be additional crossings within 1 and/or 2 miles of a given crossing.
